

Slow down to speed up your savings.

Retrofit Program: Demand Control Kitchen Ventilation

Most commercial exhaust fans operate only at full speed - venting not only smoke and steam, but also cooled and heated air, leading to increased electricity costs. Optimize your existing fan with Demand Control Kitchen Ventilation.

Financial incentives available at retrofitmybusiness.com

Control your speed. Control your budget.

Exponential savings.

A little can save a lot. Reducing your fan's speed by 20% can lead to a 50% decrease in energy use.

Increased comfort.

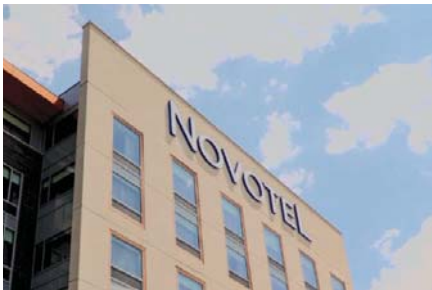

When your exhaust fan vents less treated air out of your building, your HVAC unit doesn't need to work as hard to make up the difference.

Lower noise levels.

Regulating exhaust fans removes less air, leading to a quieter kitchen.

Decreased maintenance.

Keep your ventilation system in peak condition and decrease costs by running it less frequently.

Eugene Vinogradov

General Manager, Novotel Vaughan

"Installation of all the systems considerably reduced the temperature in the kitchen and helped us save energy."

Retrofit Incentive Received: **\$13,138**

Annual Cost Savings: **\$17,568**

Alex Brigante

Owner, Vinnie Zucchini's

"Regulating our fans made it more comfortable not only for our patrons but also our staff."

Retrofit Incentive Received: **\$12,873**

Annual Cost Savings: **\$21,183**
