

A worker in a safety vest is using a blue air hose tool in a factory setting. The worker is in the background, slightly out of focus, while the foreground shows a close-up of the worker's hands holding the tool. The tool has a blue coiled hose and a silver handle. The background shows a factory floor with vertical metal bars.

Fewer leaks means better business.

Retrofit Program: Compressed Air

The majority of compressed air systems are oversized for their needs, and have leaks. Add variable frequency drives (VFDs) to right size your compressor without replacing it, and consider plugging air leaks to further your savings.

Financial incentives available at retrofitmybusiness.com

Eliminating leaks is just the beginning.

Increased flexibility.

VFDs allow you to right size” your compressor without replacing the motor.

More competitive.

Fewer leaks means lower electricity costs, leaving you with more money to reinvest in your business.

More productivity.

Air leaks are loud. Fixing them can create a safer workplace with fewer distractions.

More savings.

Recycle the energy produced by your compressor with a heat recovery system.

Gaston Petrucci

EVP, Compact Mould

“Participating in the Retrofit Program has made it easier to stay competitive and improves our bottom line.”

Retrofit Incentive Received: **\$11,090**

Annual Cost Savings: **\$9,280**

Michael Lue

Engineering Manager, ArcelorMittal Tailored Blanks

“The Retrofit Program allowed us to move our business to a whole new level... it’s not just about lighting upgrades.”

Retrofit Incentive Received: **\$59,149**

Annual Cost Savings: **\$65,064**
