

A photograph of a modern, open-plan office space. In the foreground, a woman with dark hair tied back is sitting at a desk, working on a computer. In the middle ground, two men are sitting on office chairs, facing each other and talking. In the background, two more people are sitting at a long table near a large window. The office has a high ceiling with exposed ductwork and modern lighting fixtures. The overall atmosphere is professional and collaborative.

Comfortable temperature. Better productivity.

Retrofit Program: HVAC

Most commercial HVAC systems are oversized for their needs, which leads to greater energy costs and temperature fluctuations. Optimize your existing HVAC systems by adding controls, variable frequency drives, and demand control ventilation. These improvements can save electricity, while increasing comfort and productivity.

Financial incentives available at retrofitmybusiness.com

A small change means big savings.

Exponential savings.

Reducing your fan's speed by 20% can lead to a 50% decrease in energy use.

Greater productivity.

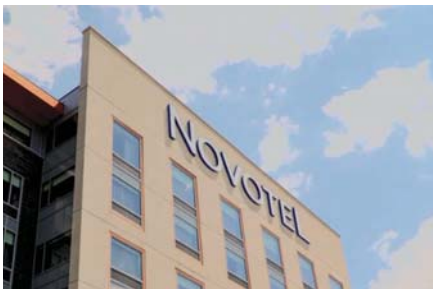

Reduced noise from lower motor speeds means a safer environment with fewer distractions.

Increased comfort.

Efficient HVAC systems don't overcompensate during temperature fluctuations.

Decreased maintenance.

Keep your ventilation system in peak condition and decrease costs by running it less frequently.

Eugene Vinogradov

General Manager, Novotel Vaughan

"Installation of all the systems considerably reduced the temperature in the kitchen and helped us save energy."

Retrofit Incentive Received: **\$13,138**

Annual Cost Savings: **\$17,568**

Alex Brigante

Owner, Vinnie Zucchini's

"Regulating our fans made it more comfortable not only for our patrons but also our staff."

Retrofit Incentive Received: **\$12,873**

Annual Cost Savings: **\$21,183**
